November 1995

MIDWEST CHAPTER, FRIENDS OF MINERALOGY, INC

PRESIDENT'S PATTERN

It is difficult to realize our November meeting at the Indiana State Museum is the final one for 1995. Where has all the time gone?

During the year we have enjoyed a two-fold purpose by combining meetings with our visits to the Gem and Mineral Shows in Cincinnati, Bloomington and Greenfield. There have also been a number of interesting field trips, even though members' participation has been low. I for one am sorry to have missed these opportunities due to other obligations. My sincere thanks to Mike Davis for his efforts.

Following Dr. Henry Barwood's presentation on Arkansas Minerals, Al and Sylvia Secree shared minerals and photographs from their Alaskan trip.

In speaking with a few of the dealers at the Greenfield Show, they appreciated the cooler weather. It helped their sales.

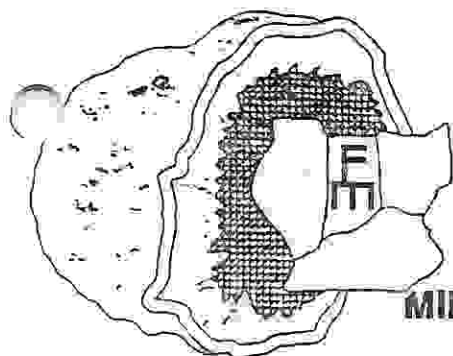

Reminder- we have a nominating report for our November election. Now is your opportunity to retain, revise or reject your present officers.

This may be a little early but it is the only opportunity I have to wish you all a very Merry Christmas.

It has been a pleasure and an interesting experience to be your president for the past year.

See you in November.

CRYSTALLOGRAPHY is defined in the dictionary as the science of crystallization dealing with the system of forms among crystals, their structure, and their forms of aggregation. Interested? You should be if you collect, buy, sell, or just admire gems and minerals! To learn more, attend our next meeting - details on the reverse side.
